EDUCATION

COLLEGE OF ENGINEERING TRIVANDRUM — July 2017 – June 2021
B Tech - Electrical & Electronics Engineering — Trivandrum, Kerala

EXPERIENCE

IQVIA RDS | SDE II (Backend Developer & Team Lead) — Kochi, India | April 2025 – Present

- Engineered scalable, asynchronous **REST APIs** using **FastAPI**, **SQL Alchemy** and **Pydantic**, integrating with Appian platform to boost automation capabilities and reduce manual tasks by 60%.
- Implemented robust data access layers using **SQLAlchemy ORM** to interface with **Oracle SQL Developer**, ensuring type safety and code maintainability across microservices.
- Extended FastAPIs security model by implementing **OAuth 2.0 Client Credentials** flow, enabling enterprise-grade authentication for 50+ internal applications.
- Enhanced API response times and pipeline efficiency by 40% through strategic **Redis caching** and structured JSON logging integrated with **Datadog**.
- Delivered end-to-end data visualization (Dashboard and Metrics) solutions by developing custom APIs that integrated complex datasets into **Spotfire**, enabling the business team to track key performance indicators (KPIs) effectively.

AGGNE (A WIPRO COMPANY) | Senior Software Engineer — Remote | Feb 2025 – Apr 2025

- Worked as an origami risk developer for US based insurance clients.
- Guided and trained junior developers in Origami Risk low code no code platform to create insurance applications.

DELOITTE USI | Analyst — Bengaluru, India | Sept 2021 – Jan 2025

- Contributed to the migration of an existing Guidewire application to microservice architecture on **AWS** cloud and python.
- Replaced ETL job by implementing Salesforce Bulk API in an existing java spring boot application to reduce data transfer waiting time from 24 hours to less than 5 minutes.
- Developed insurance underwriting applications and premium calculating (rating) engines from scratch using Origami Risk low-code/no-code platform and JavaScript for 3 US Insurance clients.
- Created client specific reports, batch processes and Form Tag extensions by leveraging data analysis and SQL skills.
- Developed an insurance book transfer application to handle books of business from external agencies using Python and AWS Serverless services. (**Lambda, S3, API Gateway, DynamoDB**, etc.)
- Created software functionalities using TDD methodology using python and Pytest module of python. Created unit tests and integration tests for a java application and increased the test coverage of the application from 5% to 95% using JUnit.

SKILLS

Programming Languages	Python, SQL, Vanilla JavaScript
Libraries/Frameworks	FastAPI, Pydantic, SQLAlchemy, Pytest, Pandas, Polars

Tools / Platforms	Git, GitLab, AWS, VS Code, GitHub, GitBash, Jira, Azure Devops, Postman, Origami Risk, Kubernetes, GitHub Copilot, HashiCorp Vault
Databases	MS SQL Server, Oracle SQL Developer, Redis

CERTIFICATIONS

- AWS Certified Solutions Architect Associate - Amazon Web Services
- AWS Certified Cloud Practitioner - Amazon Web Services

HONORS & AWARDS

- Applause award for outstanding performance in project contribution from Deloitte
- Applause award for developing and delivering product enhancement single-handedly from Deloitte
- Spot award for guiding and onboarding new joiners from Deloitte * 2
